

MIGUEL SANTAOLALLA

FRONT-END REACT DEVELOPER

+34 622002204 msantaolalla@gmail.com [Linkedin](#)

PROFILE

- I am responsible for web developments and take the lead in UI/UX design for mobile and desktop applications utilized by esteemed organizations such as the Spanish Ministry of Defense, National Police, Civil Guard, Spanish Government Agencies, and private entities.
- In addition to my role as a Front-End Developer, I am a self-driven professional who actively engages in personal development through independent projects and ongoing learning efforts

WORK EXPERIENCE

Front-end Developer - [IMBox.me](#) - 2019 - Present

- As a front-end developer, I specialize in leveraging **ReactJS**, **HTML**, **SCSS**, and **JavaScript** to craft interactive and visually compelling web applications. My expertise extends to Modern React features such as **NEXT.js 14**, **Redux-Toolkit**, **React Query**, **Custom Hooks** and **React Router** among others.
- Proficient in unit and integration **testing** using **React Testing Library** and **Vitest**.
- Utilizing development tools like **TypeScript**, **SourceTree**, **GitHub**, and **Visual Studio Code**, I have honed my skills in translating intricate design concepts into clean and semantic code.
- At IMBox.me, I have implemented Agile best practices. Effectively managed projects using tools like **Jira** and practiced **Kanban/Scrum** with the team
- Recently, I single-handedly designed and developed a web project named '[Moviewiser](#),' which has nearly 100,000 active users. This initiative integrates OpenAI's Artificial Intelligence capabilities with Movies and TV shows to deliver personalized recommendations. This accomplishment highlights my ability to independently conceptualize, design, and implement successful projects that resonate with a broad user base.
- In addition to my development role, as a **UI/UX designer**, I led the redesign of Android and iOS apps, improving user experiences and enhancing client satisfaction.

UX/UI Designer - [IMBox.me](#) - 2017 - 2019

- Proficient in **Figma** for full UI/UX design of Android and iOS applications. Skilled in conducting user research and developing user-centered designs that align with business goals.
- Created design systems and pattern libraries to optimize design workflows. Collaborated with cross-functional teams and developers to ensure accurate implementation and timely delivery of designs.

QA Manager - [IMBox.me](#) - 2014 - 2017

- Leading the testing processes of Android, iOS, Windows, and MacOS applications. Implementation and configuration of automated tests using **Selenium** and **Appium**. **Development in Python**

Tester and Tech Support - [IMBox.me](#) - 2012 - 2014

- Elaboration and documentation of use cases in test environments for Android and iOS applications. Execution of test environment in multiple scenarios. Opening and tracking of incidents closely collaborating with the development team.
